

# CX7293 | Embedded PC with Arm® Cortex®-A9 and PROFINET RT device

**i Product status:** product announcement | estimated market release on request

The CX7293 Embedded PC has an Arm® Cortex®-A9 single-core processor with 720 MHz. In the basic configuration, the CX7293 has a slot for a microSD card and an Ethernet interface. As a special feature, the CX7000 series has eight integrated multi-functional inputs as well as four integrated multi-functional outputs.

E-bus or K-bus terminals can be attached as required; the CX7293 automatically recognizes the type of I/O system connected during the start-up phase. The control system is programmed with TwinCAT 3 via the Ethernet interface.

The CX7293 has a PROFINET RT device interface.
